

Derry Imaging follows the American College of Radiology Committee on Drugs and Contrast media guidelines. The following factors warrant pre-contrast administration lab work.

Risk factors include:

- Age > 60
- History of Renal disease including:
 - a) Dialysis
 - b) Renal Transplant
 - c) Single kidney
 - d) Renal Cancer
 - e) Renal Surgery
- History of Hypertension requiring medical therapy
- History of Diabetes Mellitus
- Metformin – containing combinations

Labs are required within 30 days on patients with any of the above listed items.

Derry Imaging asks that the exam order, prior auth and labs be sent over together at the time of booking. This will streamline scheduling and allow us to better serve your patients.

*This will not affect STAT exams
